

- 3.** You study five lives to estimate the time from the onset of a disease to death. The times to death are:

2      3      3      3      7

Using a triangular kernel with bandwidth 2, estimate the density function at 2.5.

- (A)      8/40
- (B)      12/40
- (C)      14/40
- (D)      16/40
- (E)      17/40
